# Tip Sheet

## What to do if the Implant will not Scan

1. Re-program the scanner
2. If that does not work or you don't have the form to reprogram the scanner, add the implant manually.
3. Type the Purchase number from the blue sticker in the Implant search field. That is the same as the Lawson number.

4. You must mark that the Implant was a Tissue

**Tissue**

Is This Implant a Tissue?

5. Finally you MUST add the TackCore ID number found on the blue sticker.

**Tissue**

Is This Implant a Tissue?

Is This Tissue Autologous (from the same patient)?
