What was the most helpful aspect of your orientation to this specialty?

Meg gave me an orientation packet to spine team on day 1. She advocated for my learning and I learned so much from Meg. She precepted me at the very beginning of my orientation and I remember much of what she taught me. Meg is a great, hard working OR nurse.

Any suggestions for improvement:

*more time on certain specialty rotations during orientation

1 week would be helpful. i.e. spine, ortho, cardiac.
